

Hotel Restaurant  
**STOCKALPERTURM**

*Likeable stone for stone*

Gondo Valais Switzerland

*«New» is maybe not the right word for a house  
that has been offering people a home  
for over 230 years.*

The Stockalperturm Hotel Restaurant lives from surprises and contrasts. Where the stone in its soft composition welcomes you like a warm embrace is where the sense of well-being of this houses unfolds. History combines with the future in a stylish ambience. Also because hospitality is a genuine way of life here.

*It is irrelevant what you dream about,  
but not where.*

With their incredibly snug decor, the rooms offer modern comfort. Their charm is founded on a cosy combination of wood and stone. Each of the ten rooms plays its own spellbinding melody. Sleeping well is the best possible way to rediscover your vitality. A real highlight is the shared room (22 beds), which brings a whole new meaning to the term «dormitory» with its stylish decor.

*Together at the table, the day lives on.*

An open mind, open doors and unfamiliar ideas lead to unexpected Stockalperturnm discoveries. Wine degustations

in the wine cellar or piquant and amusing «animated dinners» maximise the pleasure of the guest's experience.

Kochbuch von 1581 aus dem Stockalperarchiv

*Sometimes all it takes is a subtle,  
spicy aroma to arouse memories of great moments.*

Saffron, mountain thyme, fresh garden salad brought to the table in a bowl: it is less the exotic feel and much more the esprit of the region that is reflected in the easily digestible, traditional cuisine. It can also be simple, traditional ingredients that, when interpreted innovatively, can provide a profound feeling of community at the table. In the restaurant on the ground floor, the oven is kept warm and tended to all day long; the dining hall offers delicious solutions for any occasion.

A restaurant for every day that is not what you would call an everyday restaurant.

*Produkte aus unserer Region*

*Greatness begins in inconspicuous moments.*

. One thought leads to another. At some point, the discussions grow into a great, joint idea which had long lay dormant in the mind. In the seminar rooms of the Stockalperturm Hotel, the assuring atmosphere allows space for creativity.

With the plenary room in the attic, the tower becomes a think tank, and the diversified surroundings bring people together to what makes them strongest: a team.

# What does an experience need for it to have earned its name?

Get into action. The Stockalperturm Hotel has dedicated itself completely to the region. From the border town of Gondo you can reach Milan in one hour along the Simplon pass, which is accessible all year round. Trade with southern Italy has flourished along this pass for centuries. Smuggler paths, mountain routes, the

Stockalper path and the mysterious gold-mines in the Zwischbergen valley open up the way to an intact mountain world where the balance between rest and activity is struck perfectly. Regardless of which direction you choose to go in.

Gondo

*There are places where the crystals are at your feet.*

Their charm of times gone by may have long since been stripped away by snow shoes, but not their tranquillity. Gondo and the Simplon region offer first-class routes, some of which are still untouched. The power of nature also makes ice climbing

possible and the wide areas of the Simplon pass are an invitation for snowkiting. Well-being cannot be planned. But you can feel it. Suddenly, very quietly. Here, in the right place at the right time.

## *From a secret to a tip*

Once a warehouse, then a hostel and always a meeting place for people looking for adventure, the Stockalper Tower has been writing history since 1670. The rich business magnate Kaspar Jodok von Stockalper from Brig in Switzerland built this as a warehouse that he could use to bring his goods onto the market at the most favourable time. Today, authentic yet up-to-date, the Stockalper Tower is writing its history as a hotel. Likeable stone for stone.
